E1. Taiwan Onshore Equity Fund ESG Assessment Report

Report Highlight

- **Summary** : This assessment report, spanning over 50 pages, encompasses sustainability data and ratings for domestic equity mutual funds in Taiwan. It provides concise rankings and data characteristics for various sustainability indicators, covering 15 sustainable metrics within the three ESG dimensions and seven categories. The report highlights the top 20 funds in each dimension and category, and conducts research on ESG-themed funds, allowing users to gain insights into the sustainability performance of domestic equity mutual funds in Taiwan.
- **Complete Database Data** : The database includes a total of 163 funds, including domestic equity funds, domestic equity index funds, and domestic index funds. It compiles 15 sustainability metrics and their scores, presenting ESG performance in various dimensions and sustainability ratings. The report also includes information on returns and AUM.
- **Methodology Handbook** : A detailed methodology handbook provides a comprehensive explanation of the research methods used in this report. It emphasizes data-driven analysis to ensure neutrality and objectivity in the evaluation process, free from subjective assessments.
- **Sustainable Investment Impact** : From financial carbon emissions to water intensity, the report thoroughly assesses the environmental impact of fund investments. It also examines the fund's influence from a social and governance perspective, considering aspects like human development and corporate governance, providing a holistic view of the fund's sustainability performance from a corporate standpoint.
